Energy Efficiency Training Center

34 Pequet Pkwy Tonawanda, NY 14215 (716) 692-3676 (716) 694-8109 fax training@energyefficiencytrainingcenter.com

Weatherization is the process of sealing air leaks and properly insulating a home.

May 2011 Newsletter

Energy Efficiency Training Center schedules classes for July, 2011.

The Energy Efficiency Training Center, located in Western New York at 34 Pequet Pkwy in Tonawanda, NY, will be offering three training courses for July 2011. Registration is still open for May and June, 2011.

July courses include the Insulation/Air Sealing Level I class. It will be held on Monday and Tuesday, July 18-19, 2011. Also offered will be the Insulation/Air Sealing Level II class. It will be held on Wednesday and Thursday, July 20-21, 2011. The Level III Insulation and Air Sealing course will be held on Wednesday and Thursday, July 27-28, 2011.

June courses include the Insulation/Air Sealing Level I class. It will be held on Monday and Tuesday, June 20-21, 2011. Also offered will be the Insulation/Air Sealing Level II class. It will be held on Wednesday and Thursday, June 22-23, 2011. The Level III Insulation and Air Sealing course will be held on Wednesday and Thursday June 29-30, 2011.

May courses include the Insulation/Air Sealing Level I class. It will be held on Monday and Tuesday, May 16-17, 2011. Also offered will be the Insulation/Air Sealing Level II class. It will be held on Wednesday and Thursday, May 18-19, 2011. The Level III Insulation and Air Sealing course will be held on Wednesday and Thursday, May 25-26, 2011.

Registration can be made by calling the Center at (716) 692-3676, or by going online line at www.energyefficiencytrainingcenter.com/registration.html .

All of the training courses for weatherization offered by the Energy Efficiency Training Center have received the "Recognized Training" designation from the Building Performance Institute (BPI). All are recognized for Continuing Education Units (CEU). All courses taught at the Energy Efficiency Training Center meet the professional standards of the BPI. More information on BPI can be found at: www.bpi.org .

In addition, the Energy Efficiency Training Center has earned "Affiliate" status with the Building Performance Institute.

For more details on any of the courses, check out www.energyefficiencytrainingcenter.com , or call (716) 692-3676.

During the start-to-finish two day, hands on training sessions, students will learn how to install attic, wall and floor insulation; implement air sealing procedures, seal ductwork, install vapor barriers, and fulfill additional energy audit requirements.

All courses at the 2,400 square foot state of the art training facility feature open enrollment. That means there are no pre-entry requirements to be met. The training is available to any adult 18 and over who is interested in delivery residential energy efficiency services as a career.

More information is available at www.energyefficiencytrainingcenter.com ; by e-mail at training@energyefficiencytrainingcenter.com ; or by phone at (716) 692-3676.

The EETC website is your link to home energy/weatherization training.

The Energy Efficiency Training Center website includes all the details concerning the Center and the training courses offered. We've added a lot of new photos and features to give you a visual understanding of the Center and our training methods.

The website also includes frequently asked questions and answers, contact information and a downloadable brochure. Registration can also be accomplished online or by downloading a registration form and then mailing it in. Of course, more information can also be obtained by simply calling (716) 692-3676.

Weatherization saves energy

Weatherization saves energy in the home by repairing and improving the building. The goal is to increase your home's energy efficiency, safety, and comfort by eliminating drafts by weather-stripping or repairing broken exterior doors, patching small holes in walls and roofs (and repairing damaged windows), and performing minor furnace maintenance and repair, insulation in attic, walls, floor and perimeter, and insulating water heater pipes or furnace ducts.

The energy conservation resulting from these efforts helps our country reduce its dependence on foreign oil and decrease the cost of energy for families in need while improving the health and safety of their homes. . Families receiving weatherization services see their annual energy bills reduced.

That is good for our economy and for the environment. But, there is another important benefit...thousands of new jobs in the expanding weatherization and home energy efficiency industry.
